

LIFT (Low-Input Farming and Territories – Integrating Knowledge for Improving Ecosystem Based Farming)

(<https://www.lift-h2020.eu/>)

The project has received funding from the HORIZON 2020 programme

(<https://ec.europa.eu/programmes/horizon2020/en>)

Duration of the project: 01/05/2018 – 30/04/2022

Objectives - to identify the potential benefits of the adoption of ecological farming in the European Union (EU) and to understand how socio-economic and policy factors impact the adoption, performance and sustainability of ecological farming at various scales, from the level of the single farm to that of a territory.

Project partners

- INRA - French National Institute for Agricultural Research (France)
- VET-AGRO SUP – Institute of higher education and research for food, animal health, agronomic and environmental sciences (France)
- IRSTEA – National Research Institute of Science and Technology for Environment and Agriculture (France)

- IRWiR PAN – Institute of Rural and Agricultural Development of Polish Academy of Sciences (Poland)
- DEMETER – Agricultural Economics Research Institute (Greek)
- UNIKENT – University of Kent (United Kingdom)
- IT – INRA Transfert S.A. (France)
- ECOZEPT – ECOZEPT GbR (Germany)

Project activities

A specialist from Department of Development of Innovation (LAAS) took part in a kick-off meeting of the project LIFT which was held on 19-20th June in France. LAAS is a member of the International Advisory Board of the project. LAAS offers recommendations on dissemination of results of the project and suggests how to apply these results in practice. The first report made by LAAS can be found in the platform of communication of the project.
